

ADVICS

Ultra-Premium Brake Pads

ADVICS designs and produces brake pads for Original Equipment Manufacturers (OEM) around the world. The engineering that goes into ADVICS ultra-premium brake pads has taken original ceramic friction technology to the next level, resulting in increased stopping dominance and overall performance.

Features & Benefits:

OE Ceramic Friction Formulations

Quiet, smooth & safe stopping. Significant reduction in noise & comebacks. Greater heat dissipation adding to extended pad & rotor life.

Slots and Chamfers

Designed to virtually eliminate vibration & hard pedal feel.

Application Specific Friction

Provides OE pedal feel & stopping power.

ADVICS

ADVICS engineers and manufactures the best overall brake systems in the world. To learn more about ADVICS Aftermarket products, please email AMsales@advics-na.com.

The ADVICS OE engineering team manages the design and manufacturing of each part number offered in the Aftermarket. This dedication and focus assures continuous delivery of OE quality and performance with every set sold.
