

ADVICS

Making the World a Safer Place by MASTERING BRAKE SYSTEMS

The **ADVICS** brand and brake system expertise was introduced more than a decade ago, combining several original equipment brake manufacturing plants that have been in the automotive market since the 1960s. All manufacturing capabilities were consolidated in order to engineer the best overall brake systems in the world.

The optimum control derived from the **ADVICS** total braking system results in a comfortable and safe ride every time. With applications for passenger cars and light trucks, **ADVICS** products meet or exceed OE specifications, assuring industry-leading braking performance.

As a premier supplier of original equipment brake system products, **ADVICS** is proud to offer these quality products to the automotive aftermarket:

- Ultra-Premium Brake Pads
- Brake Master Cylinders
- Brake Wheel Cylinders
- Brake Boosters

Visit www.ADVICS-na.com to learn more about **ADVICS** braking systems.

BRAKE PADS:

ADVICS Ultra-Premium Brake Pads offer coverage for over 62 million vehicles in operation within North America (USA and Canada). The Original Equipment (OE) engineering team manages the design and manufacture of each part number offered by ADVICS in the Aftermarket. This dedication assures the continuous delivery of OE quality and performance with every set sold.

- OE-Equivalent and Direct Fit parts
- Extreme braking performance due to ADVICS engineered, ceramic friction formulations
- Quiet, smooth, and low-dust operation under all braking conditions
- Extended pad and rotor life

HYDRAULICS:

ADVICS's original equipment technology and expertise is applied to their designs and engineering hydraulics. Each part manufactured is vehicle-specific, ensuring a perfect fit and efficient performance.

- Precision honing of hydraulic cylinders are monitored under OE quality control standards.
- Anodizing and "Kanizen" plating of cylinder bodies strengthens surface, ensuring smooth operation of the piston while resisting corrosion.
- Heat resistant and extended life Ethylene Propylene Rubber (EPDM) seals prevent leakage.
- Quick response design reacts to driver's clutch and brake pedal input.

BRAKE BOOSTERS:

ADVICS Brake Boosters are engineered to exact OE specifications, delivering ideal air pressure to the brake master cylinder and a smooth braking action.

- Delivers optimal air pressure to the brake master cylinder.
- Provides precise feel while preventing driver fatigue.
- Manufactured with the highest quality materials to ensure safe operation and maximize durability.
