

APPENDIX A-02 SPECIAL CHARACTERISTICS SYMBOLS

SYMBOL	ALTERNATE DEPICTION	EXPLANATION
▽S		Safety Characteristic A characteristic that affects a safety related performance or function
◇A		Critical Characteristic A characteristic that affects a safety related performance or function
▽R		Regulatory Characteristic A characteristic that requires government regulation or control
▽E		Emissions Characteristic A characteristic that requires emissions control or reporting
◇J		Special Characteristic A characteristic that affects the function or assembly capability of a part
□ LQ		Special Characteristic – Lexus Quality Mark A characteristic that affects an identified Lexus Quality characteristic

In some instances, where ADVICS does not have design responsibility or does not generate production drawings, alternative symbols may appear. If this condition exists, the supplier should reference the appropriate international standard (i.e., JIS, SAE, etc.) for clarification. Due to the large number of possible alternative depictions, they have not been included in this manual.
